

BIEL TOOL

Think of the times you have been exposed to situations when the need for a small, strong, forcible entry tool was immediate and you were unable to act because you didn't have the right tool to do the job.

Now you can act quickly! The Biel Tool, (pronounced BEE'L) is a personal size multi-purpose forcible entry and rescue tool, designed for forcing doors and windows, prying and twisting hasps and locks, light overhauling, metal cutting and chopping.

The Biel Tool incorporates many features found in the famous Paratech "Pry-Axe", but is much smaller at 15 in (38.1 cm) long in its closed position and 19 in (48.3 cm) extended and light enough, 3.3 lbs (1.5 kg) to wear on a belt, or to carry in the pocket of a bunker coat. The Biel is constructed of alloy steel forgings, heat treated for maximum strength and durability, and chrome plated or with an electroless nickel finish for easy maintenance.

Description	Part No.	Length in (cm)	Weight	
			Net lbs (kg)	Ship lbs (kg)
Biel Tool	22-000550	15 (38.1)	3.2 (1.5)	3.2 (1.5)
Sheath	22-000555	5 (12.7)	0.5 (0.2)	0.5 (1.2)
Biel Tool & Sheath	22-000551	15 (38.1)	3.7 (1.7)	3.7 (1.7)
